DETAILED ACTION

1. Claims 1, 10, and 26-28 remain for examination.

Response to Arguments

2. Applicant's arguments, see the amendment filed 1/05/06, with respect to the various rejections of claims 1, 10, and 26-28 under 35 USC 103 over the various cited references, the double patenting rejection of claim 26, and the objection to claim 1 have been fully considered and are persuasive. The aforementioned rejections/objections have been withdrawn.

3. Examiner notes that Applicant failed to traverse the double patenting rejection of claim 1. In fact, it is noted that each of the limitations that Applicant illustrated as belonging to claim 8 of the '961 patent but not recited in claim 26 of the instant application are explicitly recited in claim 1 of the instant application. As such, the double patenting rejection of claim 1 remains proper.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 8 of U.S. Patent No. 6,252,961. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patent claim recites every element from the claims of the instant application except for two details. With regards to the ECC block that is coded according to an error code correction method, this element is a tautology that adds no new matter over the claim in the instant application; a block of ECC-coded data must, by definition, be encoded according to an error code correction method. With regards to the encryption mask being encoded according to the same error code correction method, note that the patent teaches that the disclosed system would function correctly even if the encryption mask contained errors (Hogan, column 5, lines 60-63). Therefore, it would have been obvious to one of ordinary skill in the art to omit this step, as it would not disrupt the functioning of the remaining elements while simplifying the overall design. See *In re Karlson* 136 USPQ 184 (CCPA 1963)

Allowable Subject Matter

6. Claims 26-28 are allowed.
7. Claim 1 would be allowable over the prior art, pending resolution of the double patenting rejection above.

8. Claim 10 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
